Next Generation of Strategy Game An online

strategy game developed by Microsoft Studios for the Xbox One. The game is a remake of the original Xbox classic Ages of Empires, which is itself a remake of the game released in 1996. The game takes place in the Old West era where the player must manage a military to expand their empire, which can be further enhanced with new units and technologies. Gameplay The player assumes the role of one of the three major nations during the American Civil War; the United States, which is America's leading power, the Confederate States of America, which rebels from the Union, and the Kingdom of Mexico, a monarchy based on the city of Mexico. During gameplay, the player must build a city in the game world, gather resources, and manage their military forces. The military can be used in several ways, including combat, or placed under the control of a Governor, who uses their military in order to govern the land, on occasion joining together in alliance with other allies to help defeat the opposing armies. The game world consists of a number of provinces, where the player must

perform objectives that include conqueror the province, build factories, and research new technologies. The game features one of the largest multiplayer communities on the Xbox Live, with millions of players per month. The game supports up to four players online and split-screen play for up to four players. The game also supports up to four AI-controlled players for quick games. I was practicing Boolean algebra in haskell and I came across the following question : If $S_{1}=\emptyset$ and $S_{2}=\{false\}$, then what is the difference between $\{false\}\cup\emptyset$ and $\{false\}$? There are three possible cases: 1) The first case would be: \begin{align*} \{false\}\cup\emptyset

&=\{false\} \q
